

ALEENA MANOJ

Bangalore, India | 9497536397 | aleenaaliss2003@gmail.com

PROFESSIONAL SUMMARY

Data Analyst skilled in Python, SQL, and Power BI with strong expertise in data cleaning, exploratory data analysis (EDA), hypothesis testing, and time series forecasting. Experienced in building dashboards, predictive models, and statistical solutions to support business decision-making. Adept at transforming raw data into actionable insights that drive organizational growth.

TECHNICAL SKILLS

Data Analysis & Visualization: SQL, Power BI, Matplotlib, Seaborn

Programming & ML: Pandas, NumPy, scikit-learn, Ridge Regression, CNN

Statistical Methods: Hypothesis Testing, Time Series Forecasting, Regression Analysis, Chi-Square, Mann-Whitney U Test

Other: Data Cleaning, Feature Engineering, Dashboard Development

EDUCATION

MSc Big Data Analytics - St. Joseph's University, Bangalore (Expected 2026)

BSc Mathematics - Devamatha College, Kuravilangad (2024)

INTERNSHIP EXPERIENCE

Data Science Intern - AGH Advisors (Dec 2025 - Mar 2026)

- Conducted exploratory data analysis and preprocessing on structured datasets
- Built and evaluated machine learning models to improve analytical insights
- Applied statistical techniques to support data-driven business decisions

PROJECTS

Customer Churn Analysis using Excel: Analyzed customer behavior and retention trends using pivot tables, charts, and dashboards to identify churn patterns.

US House Prices Visualization using Power BI: Built interactive dashboards to analyze housing price trends, regional comparisons, and market insights.

EV Battery Degradation Prediction: Implemented Ridge Regression to forecast battery degradation; built chatbot interface for insights.

Gold & Silver Price Analysis: Conducted time-series analysis and visualizations using Pandas & Matplotlib; identified market trends.

Time Series Forecasting – Bangalore Land Prices

- Built SARIMA/SARIMAX model for 5-year price prediction
- Performed trend, seasonality analysis, and model validation

Legal Document Summarization Pipeline

- Developed ML-based NLP pipeline using web scraping and FIRAC framework

- Automated classification and summarization of legal documents

Scar Reduction Treatment Analysis

- Conducted statistical analysis using Mann-Whitney U Test, Fisher's Exact Test, and Chi-Square Test
- Identified statistically significant differences between treatments

Student Database Analysis using SQL

- Performed SQL-based analysis on student marks and attendance datasets
- Used joins, GROUP BY, CASE statements, and window functions for reporting and insights

Animal Image Classifier (CNN): Built deep learning model achieving high accuracy in multi-class image classification.
